

Takanock Intake Hub

How to submit requests and check ticket status · All Takanock employees

App URL	takanock-hub-v1.vercel.app
Time required	~2 minutes to submit a request
Prerequisites	None — no login required, works in any browser

Overview

The Takanock Intake Hub is the official way to submit IT, GIS, and automation requests at Takanock. Instead of sending a Slack message or email directly to someone, you describe your issue through the hub, and it routes your request to the right team automatically. Every submission is tracked so you can see its status at any time.

The hub has three tabs:

- Assistant — describe your problem in plain language and the assistant figures out where to route it, or tells you who to contact
- Submit a Request — go directly to the IT, GIS, or Automation intake form
- Check My Ticket — look up the status of your submitted requests by email

Tip: Install it as a desktop app

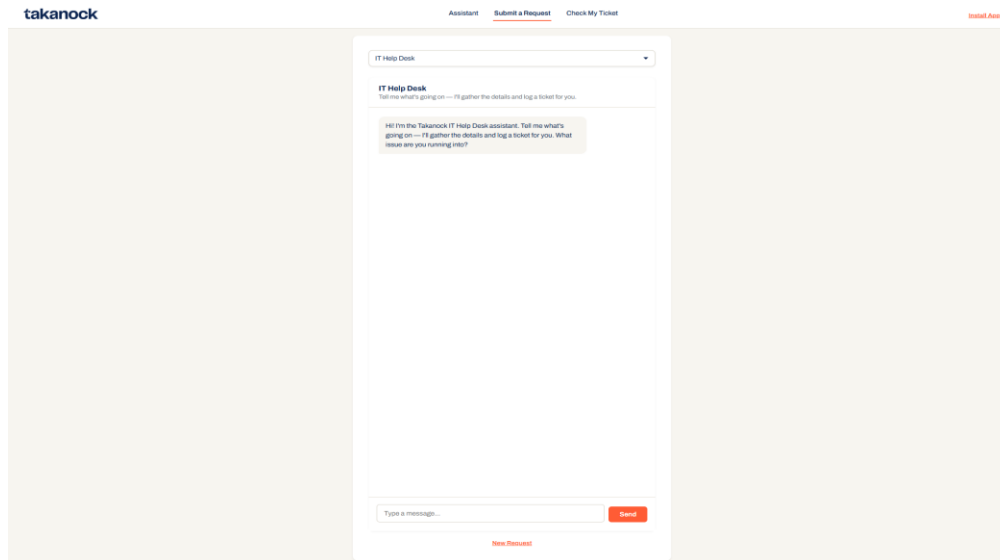

Open the hub in a browser and click “Install App” in the top right. The hub will appear on your desktop like any other app — no browser needed.

How to Submit an IT Request

Use this for: access and permissions issues, SharePoint problems, hardware issues, Slack troubleshooting, software issues, email or calendar problems, and any other technology-related requests.

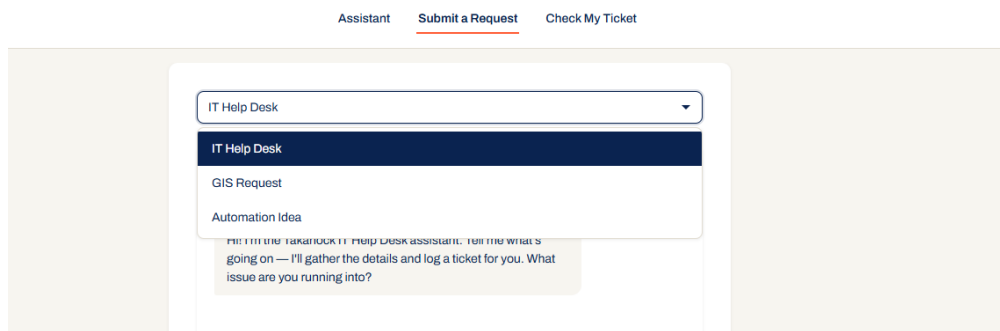

Submissions go to: Charles Jones (cjones@takanock.com) and Jacob Paul (jpaul@takanock.com)

1. Go to takanock-hub-v1.vercel.app and click Submit a Request in the top navigation.

The screenshot shows the Takanock web application interface. At the top, there is a navigation bar with the 'takanock' logo on the left and three links: 'Assistant', 'Submit a Request' (which is underlined), and 'Check My Ticket'. On the far right of the navigation bar, there is a link that says 'Insert App'. Below the navigation bar, there is a large white rectangular form. At the top of this form is a dropdown menu currently set to 'IT Help Desk'. Below the dropdown, there is a section titled 'IT Help Desk' with a sub-header 'Tell me what's going on — I'll gather the details and log a ticket for you.' Below this is a message from the assistant: 'Hi! I'm the Takanock IT Help Desk assistant. Tell me what's going on — I'll gather the details and log a ticket for you. What issue are you running into?'. At the bottom of the form, there is a text input field with the placeholder 'Type a message...' and a red 'Send' button. Below the input field, there is a small red text label that says 'New Request'.

2. Select IT Help Desk from the dropdown menu.

This screenshot is a close-up of the dropdown menu from the previous image. The dropdown menu is open, showing a list of options. The first option, 'IT Help Desk', is highlighted with a dark blue background. Below it are two other options: 'GIS Request' and 'Automation Idea'. Below the dropdown menu, there is a message from the assistant: 'Hi! I'm the Takanock IT Help Desk assistant. Tell me what's going on — I'll gather the details and log a ticket for you. What issue are you running into?'. The navigation bar at the top of the page is also visible, showing 'Assistant', 'Submit a Request' (underlined), and 'Check My Ticket'.

3. Describe your issue in the chat. The assistant will ask a few follow-up questions to get enough detail for Jacob to resolve your ticket without needing to follow up.

IT Help Desk

IT Help Desk

Tell me what's going on — I'll gather the details and log a ticket for you.

Hi! I'm the Takanock IT Help Desk assistant. Tell me what's going on — I'll gather the details and log a ticket for you. What issue are you running into?

I need access to the commercial sharepoint page

Sure, I can help with that! What's your full name and which department are you in?

Mia Tursman, operations

Thanks Mia! Can you tell me a bit more about what's going on? For example, are you getting an error message when you try to access the page, or have you just never had access to it before?

I need new access in order to view the Baccara budget

Got it! Who else, if anyone, needs this same access — or is it just you?

just me

4. Review the summary the assistant provides and confirm by saying yes.

Thanks! Here's a summary of your request:

Submitter Name: Mia Tursman

Submitter Email: mtursman@takanock.com

Department: Operations

Request Type: Permissions Issue

Request Description: Mia requires new access to the commercial SharePoint page in order to view the Baccara budget. No one else needs access at this time.

Urgency: Medium

Does this look right? If so, just say "yes" and I'll get it submitted!

yes

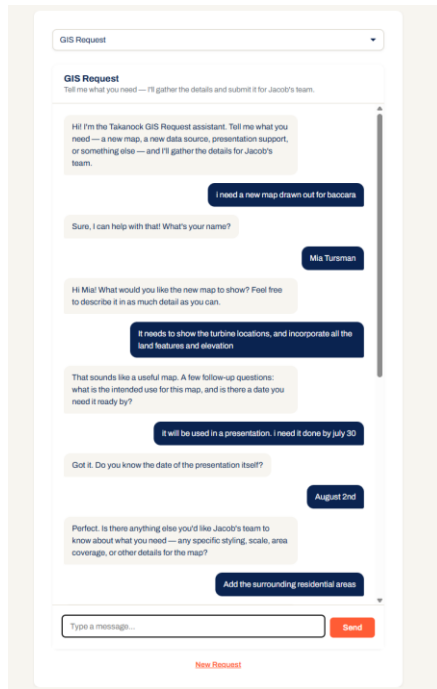

5. Your ticket is submitted. You will see a confirmation message in the chat.

How to Submit a GIS Request

Use this for: new maps, data layers, site assessments, parcel data, presentation support, and any other geospatial requests.

Submissions go to: Jacob Paul (jpaul@takanock.com)

1. Go to takanock-hub-v1.vercel.app and click Submit a Request in the top navigation.
2. Select GIS Request from the dropdown menu.
3. Describe what you need. The assistant will collect details including the project, request type, and relevant dates.

The screenshot shows a chat interface titled "GIS Request". At the top, it says "Tell me what you need — I'll gather the details and submit it for Jacob's team." The chat history shows the following messages:

- Assistant: Hi! I'm the Takanock GIS Request assistant. Tell me what you need — a new map, a new data source, presentation support, or something else — and I'll gather the details for Jacob's team.
- User: I need a new map drawn out for baccara
- Assistant: Sure, I can help with that! What's your name?
- User: Mia Turman
- Assistant: Hi Mia! What would you like the new map to show? Feel free to describe it in as much detail as you can.
- User: It needs to show the turbine locations, and incorporate all the land features and elevation
- Assistant: That sounds like a useful map. A few follow-up questions: what is the intended use for this map, and is there a date you need it ready by?
- User: It will be used in a presentation. I need it done by July 30
- Assistant: Got it. Do you know the date of the presentation itself?
- User: August 2nd
- Assistant: Perfect. Is there anything else you'd like Jacob's team to know about what you need — any specific styling, scale, area coverage, or other details for the map?
- User: Add the surrounding residential areas

At the bottom, there is a text input field labeled "Type a message..." and a "Send" button. Below the chat area, it says "New Request".

4. If you have relevant files, paste a SharePoint or OneDrive link when prompted. If you don't have a link, you can send files directly to jpaul@takanock.com after submitting.
5. Review the summary and confirm by saying yes.
6. Your request is submitted. You will see a confirmation message in the chat.

How to Submit an Automation Idea

Use this for: any repetitive process you think could be automated, tools you wish existed, workflow improvements, or anything you find yourself doing manually that feels like a computer should do it.

Submissions go to: Ivan Benavides (ibenavides@takanock.com)

1. Go to takanock-hub-v1.vercel.app and click Submit a Request in the top navigation.
2. Select Automation Idea from the dropdown menu.

3. Describe what you want automated. The assistant will ask about the business problem, your current process, and what the ideal solution would look like.

The screenshot shows a web form titled 'Automation Idea' with a dropdown menu. Below the title is a sub-header 'Automation Idea' and a description: 'Tell me what you want automated — I'll gather the details and log it for Ivan.' The form contains several text input fields and a 'Send' button. The first input field contains the text: 'Hill I would like to receive a weekly automated email with updates on the current stages of Baocara'. The second input field contains: 'Mia Turman, operations'. The third input field contains: 'I need milestone progress, and open tasks. As well as what stage the project is currently in'. The fourth input field contains: 'This can be pulled from "samples/tablebase"'. The fifth input field contains: 'Perfect, that's helpful. And how do you currently get this information when you need it — do you manually log into that Airtable base and look it up yourself, or does someone send it to you?'. The form also includes a 'Type a message...' input field and a 'Send' button. At the bottom, there is a 'New Request' link.

4. If you have any relevant documents or data sources Ivan should reference, paste a link when prompted or share them directly with ibenavides@takanock.com.
5. Review the summary and confirm by saying yes.
6. Your idea is submitted. Ivan will review and follow up.

Not Sure What Type of Request You Have?

Use the Assistant tab. Open the hub, stay on the Assistant tab (it's the default), and describe your situation in plain language. The assistant will:

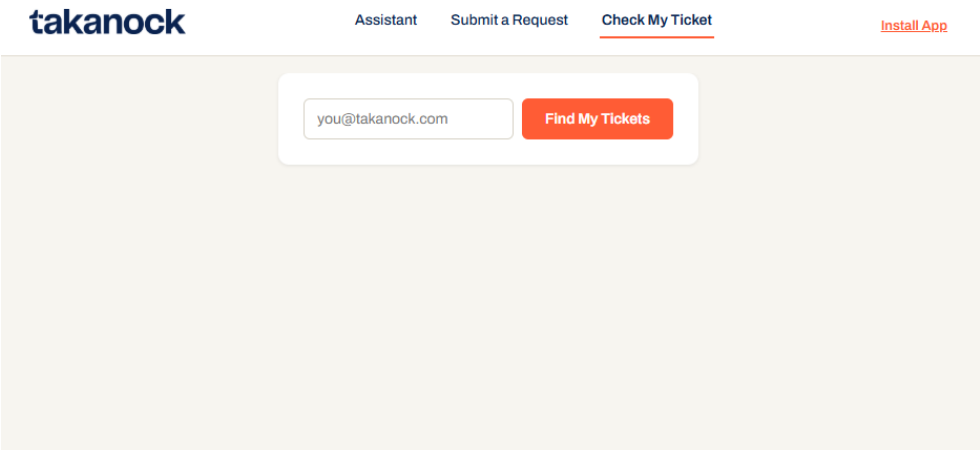

- Identify what type of request it is and route you to the right form, or
- Tell you the right person to contact directly

The screenshot shows a chat interface titled 'Takanock Assistant' with a description: 'Describe your problem and I'll get you to the right place — or tell you who to ask.' The chat history shows a message from the assistant: 'Hi, I'm the Takanock Assistant. What do you need help with today? Describe your problem and I'll get you to the right place — or tell you who to ask.' The user's response is: 'I am wondering the current budget status for Tallmadge'. The assistant's response is: 'That sounds like a project finance question rather than an IT, GIS, or automation request, so I can't route it through one of those forms. For budget questions on the Tallmadge project, your best bet is to reach out to Joel Zemanek, the Tallmadge project director. His email is jzemanek@takanock.com. You might also loop in someone on the finance side like Corey Schwab, Director of Strategic Finance, at cschwab@takanock.com.'

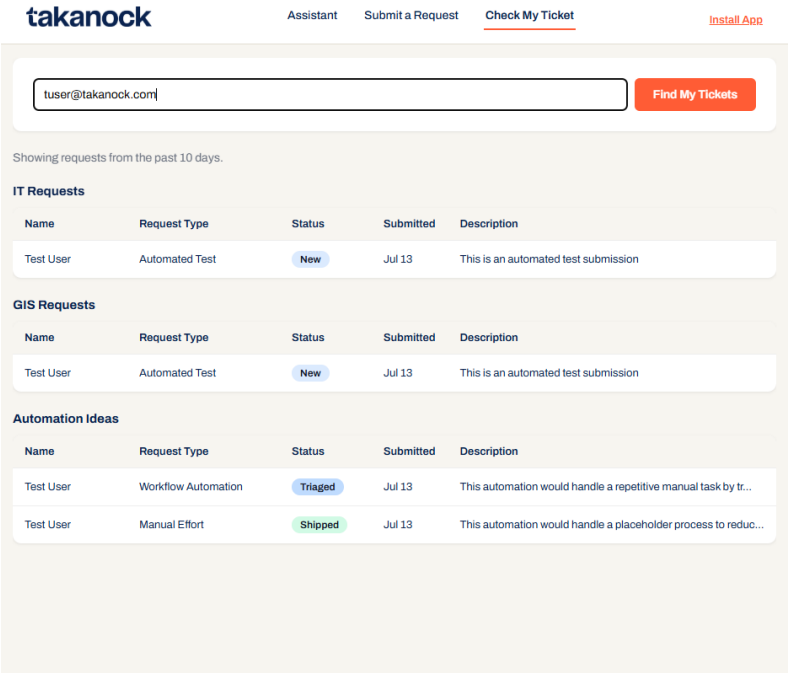

How to Check Your Ticket Status

You can look up the status of any request you have submitted without contacting anyone.

- 1. Go to `takanock-hub-v1.vercel.app` and click Check My Ticket in the top navigation.

- 2. Enter your Takanock email address and click Find My Tickets.

- 3. Your active requests from the past 10 days will appear, grouped by type (IT Requests, GIS Requests, Automation Ideas).
- 4. To see older requests, click View past requests below any section.

Request Status Definitions

Status	What it means
New	Your request has been received and is waiting to be picked up.
In Progress	Someone is actively working on your request.
Complete	Your request has been resolved.
In Backlog	Your automation idea has been logged and will be prioritized in a future sprint.
Triaged	Your automation idea has been reviewed and is being assessed for feasibility.
Shipped	Your automation idea has been built and deployed.
Declined	Your request was reviewed and will not be actioned at this time. You may receive a follow-up explaining why.

Troubleshooting

Problem	Fix
The assistant is taking a long time to respond.	This is normal on first load while the server wakes up. Wait 10–15 seconds and try again.
I got an error after submitting.	Click New Request and try again. If it keeps failing, Slack Ivan.
My tickets aren't showing up in Check My Ticket.	Make sure you're entering the exact email address you submitted with. Submissions older than 10 days appear under View past requests.
The assistant routed me to the wrong form.	Click New Request and describe your issue again with a bit more detail. Or go directly to Submit a Request and select the right type from the dropdown.
I want to install it as a desktop app but don't see the option.	Open the hub in Google Chrome. The Install App option appears in the top right corner.
Something else isn't working.	Slack Ivan Benavides (ibenavides@takanock.com).
